

Ngô Tấn Cang

Ho Chi Minh city | 0839404831 | cangngoo123@gmail.com | <https://portfolio-cang-ngo.vercel.app>

Fullstack Developer with hands-on experience building RESTful APIs with NestJS and user interfaces with ReactJS/NextJS. Proactive in exploring effective technical solutions and optimizing system performance. Eager to contribute to large-scale projects where I can deliver value while sharpening my system design thinking.

EDUCATION

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY AND ENGINEERING (HCMUTE)

Information Technology

Dec 2025- Present

Relevant Coursework: SQL, OOP, DSA, Web developer, Mobile developer.

EXPERIENCE

HOPPER SOLUTION AND EDUCATION

Ho Chi Minh city

R&D and Full stack Developer

May 2025- Jan 2026

- Built and integrated 20+ REST APIs using NestJS for core fintech modules deposit, saving, membership, and eKYC within a 5-engineer team.
- Designed PostgreSQL schemas and data flows for 4 core business modules, supporting scalable and auditable transaction processing.
- Participated in system testing and validation, identifying and resolving bugs before production release.

TNHH THƯƠNG MẠI VÀ DỊCH VỤ HƯNG THỊNH

Ho Chi Minh city

Intern Web Developer

Jan 2025- Mar 2025

- Developed and enhanced core features, improving overall system stability and maintainability.
- Participated in testing and bug fixing to reduce post-release issues.

QUALIFICATION AND SKILLS

Language: JavaScript/TypeScript, Java

Frontend: Web: React.js, Next.js, Tailwind, Responsive Web Development, Component-based Architecture, State Management with Redux/Zustand, and Context API.

Mobile Development: React Native, Expo, NFC, Push notification, REST API Integration, Authentication.

Backend: NestJS, Express.js, RESTful API, WebSocket, Redis, RabbitMQ, OAuth2.

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma, TypeORM.

Tools & Platforms: Git, Docker, Postman, Swagger, AWS, Vercel, Render.

Soft skills: Proactive learning and problem-solving skills, Teamwork, Communication.

AI Tools & Applications: Claude code, Codex, Cursor, 9Router.

PROJECTS

FLOWZONE

Dec 2025 - present

Demo: <https://flowzone.vercel.app>

Descriptions: A social networking project featuring Google login, posts, comments, reactions, real-time chat, user profiles, and content moderation to handle policy violations. The system is designed to handle high loads using Redis and RabbitMQ, specifically to manage resource-intensive features such as online status tracking and asynchronous processing.

Team size: 1 (Full stack developer).

Technical: NextJS, Spring Boot, Postgresql, Vercel, Render.
